DESCRIPTION

Capping machines series **PLATYNUM** are suitable to process all type of caps, namely: screw and press-on, twist-off, flip-top with a speed from 2800 pcs/h up to 15000 pcs/h with screw-on cap.

TECHNICAL FEATURES

- Machine frame in stainless steel AISI 304, if required, also in stainless steel AISI 316
- PLATYNUM TA 1 PP series single-head capping machine is the basic series with movement of the star and the screwing cam driven by brushless motor and with reducer
- PLATYNUM capping machines from 3 to 10 heads have the mechanical movement of the stars controlled by inverter for the adjustment of the rotation speed
- According to the type of cap we can offer different type of screwing heads such as: magnetic and hysteresis clutch, brushless for pre-threaded caps, in plastic or metal with torque adjustment
- Stainless steel closing heads
- Possibility to install servomotors for accurate electronic torque
- All the operations managed by colored touch screen operator's panel
- Automatic orientor mounted on the top of the machine or lateral, according to the type of cap
- Automatic caps elevator from floor to load the orientor (Optional)
- Quick and easy size changeover tools free
- Safety protections with stainless steel frame and access doors in lexan (or other proper material)
- Safety switches installed on the doors
- Machine realized according to EEC norms
- Machine can be supplied in ATEX or anti-corrosion version

ABOUT TECNO FLUSS

Tecno Fluss is an Italian company specialized in the manufacturing of dosing machines and complete filling and capping lines for liquid, semiliquid, dense and doughy products, belonging to the sectors of cosmetic, pharmaceutical, food & nutraceutical, chemical and home care industries.
