

## FIBERPASTA FLOUR 15% FIBER - LOW GLYCEMIC INDEX 29

500g bag– store in a cool and dry place

FiberPasta Flour is a **special premium flour mix** containing a **high fibre content** (15% fiber) and **low glycemic index** (G.I. 29). Even though it contains a so high amount of fibre, FiberPasta Flour has the same texture as the traditional flour, due to its **unique natural production process**. The flour we use is **selected among the highest quality Italian wheat flour**. FiberPasta flour mix has a **low nickel content** (0,060mg/kg) and is **free from preservatives**.

FiberPasta Flour mix is **useful for making bakery products like bread, pizza, cakes and even fresh pasta**. Due to the very high fiber amount, the dough made by FiberPasta flour requires a much higher quantity of water than the dough made by a traditional flour.

It is suggested by nutritionists for diabetic diets, weight and cholesterol control diets.

Ingredients: soft **wheat** flour 0, 14% dietary fiber (**wheat fiber, resistant starch, inulin**).  
*May contain traces of soy, mustard and lupine.*
